### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 11 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Cohen et al. (3,159,165). See figs. 2 and 7, **40** for the air conditioning unit, **10** for the wall panel of flexible material and **60/70a** for the sleeve. Regarding portability of the claims see col. 1, lines 12-14. Regarding the broad recitation of frame support, see **41**. Element **41** is a door frame, on which the flexible material rests, therefore it is considered to support the flexible material.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 2-4, 7, 10, 12-14, 17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al. in view of Meyer et al. (2,939,467). Cohen et al. discloses all of the limitations of the claim(s) except for a flap of flexible material wherein the flap is movable between a storage position and a closed position. Meyer et al. discloses the presence of a flap of flexible material wherein the flap is movable between a storage position and a closed position. See fig. 3. Hence, one skilled in the art would find it obvious to modify the system of Cohen et

al. to include the a flap of flexible material wherein the flap is movable between a storage position and a closed position of Meyer et al. for the purpose of protection against the elements.

Claims 6, 9, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al. It is well-known in the art of HVAC to design a sleeve with an elastic periphery. Thus, it would have been obvious to one of ordinary skill in the art to incorporate the features of a sleeve with an elastic periphery into the system of Cohen for the purpose of protection against the elements.

***Allowable Subject Matter***

Claims 5 and 15 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derek S. Boles at (571) 272-4872 or supervisory patent examiner Kenneth Rinehart at (571) 272-4881.
